### Comments about your tutorial

1. David has been a wonderful tutor and patiently put up with my stupidity and poor mathematics, and consistently gone the extra mile to assist me in my understanding. He has been one of the most helpful and understanding tutors i have had thus far in my university experience. it is a shame that the subject itself guarantees he cannot really help me, as all i can do is pray i get a question i am able to mindlessly regurgitate the requisite calculus, with little ability to demonstrate my not insignificant knowledge of the dynamics and issues at play in microeconomics.
2. The tutor was great but there was so much to cover in the tute questions, that sometimes he did not have time to go through everything. It is not the same reading the solutions and not everyone has time to attend consultation hours or maths help due to work commitments. Perhaps the course should cover less breadth but go deeper so students can really master the concepts and techniques so as to be able to apply them later (i.e in workplace).
3. My tutorial is great! David Delacretaz is very supportive of my learning and is very clear in explaining the concepts
4. Unsure didnt attend
5. David mentioned that it was his first year tutoring and he did a fantastic job. Rather than simply rehashing answers he made sure we had the theory explained and was always willing to meet with us if we struggled with certain concepts. I would like more practice questions in the future, possibly in a similar manner to the blue sheet pink sheet system of the earlier years.
6. David D was my tutor, he was absolutely fantastic. Very thorough and delivered the tutorial at the perfect pace. I believe his manner of teaching and going through questions allowed me to progress through what I consider to be a very difficult subject. Thankyou David - 10/10!!!
7. Tutorials are very useful, and my tutor (David Delacretaz) was always very helpful!
8. I really enjoyed the tutorials in this subject, my tutor, David Delacretaz was able to explain a lot of the intuition behind the main ideas quite clearly. Given the large disconnect between the difficulty of lecture examples and the difficulty of tute questions (with tute questions being the more difficult) I felt this helped me tremendously.
